

# The Top 6 Signs You Have an M-gap Problem

## 1 Best resources are diverted

Too many of your best IT resources are being diverted to help in deployment, infrastructure management, user support or system firefighting.

1

## 2 Lack of clear ownership

It's unclear who owns optimizing the mobile strategy, budget or overall execution.

2

3

## 3 Sideline by delays

User adoption and deployment delays sideline your mobile initiatives.

4

## 4 Functioning in silos

Your network, security and IT management teams function in silos.

5

## 5 Dread change

You dread change - apps, devices, network and more.

6

## 6 Self funding of projects

Sales or business units are initiating and funding their own mobile projects.
